

SECTION 1 IDENTIFICATION

1.1 Product Identifier

Product name: Fluorofab® 100-3 AS

100-5 AS 100-10 AS 100-14 AS

Synonyms: Anti-Static Black PTFE Coated Woven Glass

1.2 Relevant identified use of the product

Use of the Product: Industrial applications where high chemical and temperature resistance, excellent

release and anti-static properties to dissipate surface static build-up.

1.3 Details of the supplier of the safety data sheet

Company: Green Belting Industries Limited

381 Ambassador Drive

Mississauga ON L5T 2J3 Canada

Telephone: +1 905 564 6712 (09:00 to 17:00 Eastern Standard Time)

Telefax: +1 905 564 6709

E-mail address: sds-support@greenbelting.com

European Union Biscor Limited

Contact: Unit 1 Broadfield Business Park

Pilsworth Road Heywood OL10 2TA United Kingdom

Telephone: +44 (0)1706 396690 (09:00 to 17:00 UTC/GMT)

Telefax: +44 (0)1706 396691

1.4 Emergency Telephone Number

North American +1 905 564 6712 Available between the hours 09:00 to 17:00 (EST)

Emergency Telephone

Number:

European Union +44 (0)1706 396690 Available between the hours 09:00 to 17:00

Emergency Telephone (UTC/GMT)

Number:

SECTION 2 HAZARD IDENTIFICATION

2.1 Classification of the Product

European Not a classified substance or mixture according to Regulation (EC) No. 1272/2008.

Communities (EC): Not classified as dangerous according to Directive 67/548/EEC.

USA: Not a hazardous material as defined by 29 CFR1910.1200, OSHA Hazard

Communication Standard.

Canada: Not a controlled product under WHMIS.

2.2. Label elements

Symbol: None
Signal Word: N/A
Hazard Statement(s): N/A

Precautionary Statement: P261 – Avoid breathing any fume or dust that may be generated

P264 – Wash hands thoroughly after handling.

2.3. Other hazards

Use of this product is not normally considered hazardous, however material dust caused by cutting, sawing or sanding may cause eye or skin irritation. Processing at temperatures higher than 300°C can cause the evolution of particulate matter which can cause "polymer fume fever" which is a temporary condition that can cause flu-like symptoms and eye and respiratory irritation. The smoking of tobacco contaminated with PTFE can cause this condition. Processing at temperatures higher than 400°C will result in thermal decomposition of fluorinated thermoplastics and may release carbonyl fluoride which hydrolyses to hydrogen fluoride and carbon dioxide by reacting with moisture in the air. Thermal decomposition products may also include carbon monoxide and oxides of sulphur. In all cases avoid exposure, move the individual to fresh air and consult a physician if severe.

SECTION 3 COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Nature of the Mixture: Black Anti-Static PTFE coated woven glass fabric

3.1 Substances

Not Applicable

3.2 Mixtures

Ingredient Name	CAS Number	% by Weight	Exposure Limits	Symbol	Risk Phrases
Polytetrafluoroethylene	9002-84-0	5 - 69	N/A	None	None
Glass Fibre (fiberglass cloth)	65997-17-3	31 - 95	OSHA PEL - 5 mg/m ³ ACGIH TLV - 5mg/m ³	None	None
Proprietary Additive	Proprietary	1 - 2	N/A	None	None

The above product(s) are defined under the European Union's REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) regulation as articles, and as such are exempt from the material safety data sheet provisions of 29 CFR 1910.1200(G).

None of the product components are intentionally released during their use when used as intended and in accordance with recommended specifications and parameters.

This product is REACH compliant and does not contain REACH SVHCs (Substances of Very High Concern)

materials and is considered non-hazardous when used as intended and in accordance with recommended specifications and parameters.

For full text of the R-phrases mentioned in this Section, see Section 16.

For full text of the H-statements mentioned in this Section, see Section 16.

SECTION 4 FIRST AID MEASURES

4.1 Description of First Aid Measures

General Advice: Never give anything by mouth to an unconscious person. When symptoms persist or in

all cases of doubt seek medical advice.

Inhalation: N/A for material as supplied at room temperature and used as intended and in

accordance with recommended specifications and parameters. Processing at high temperature may generate fumes which can cause "polymer fume fever" leading to flu-

like symptoms. Remove to fresh air and consult a physician if severe.

Skin Contact: Not normally considered hazardous, however material dust caused by cutting, sawing or

sanding may cause skin irritation. Wash with plenty of soap and water. If irritation

persists get medical attention.

Eye Contact: Material dust caused by cutting, sawing or sanding may cause eye irritation. Wash with

plenty of soap and water. If irritation persists get medical attention.

Ingestion: If swallowed get medical advice. Do not induce vomiting unless instructed to do so by

medical personnel.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms: Local irritation.

The thermal decomposition vapours of fluorinated polymers may cause polymer fume fever with flu-like symptoms in humans, especially when smoking contaminated tobacco. Symptoms may be delayed. Repeated episodes of polymer fume fever may result in persistent lung effects. Inhalation of decomposition products from overheating

may cause lung irritation or shortness of breath.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment: Treat symptomatically.

SECTION 5 FIRE FIGHTING MEASURES				
5.1 Extinguishing Media				
Suitable extinguishing media:	Water spray, Carbon dioxide (CO2), Foam, Dry Chemical			
5.2 Special hazards arising from	m the product			
Specific hazards during fire-	Hazardous thermal decomposition products.			
fighting:	Hydrogen fluoride, fluorinated compounds, carbon oxides,			
	perfluoroisobutylene, tetrafluoroethylene, hexafluoropropylene and			
	trifluoromethane and oxides of sulphur.			
	Exposure to decomposition products can be a hazard to health.			

SECTION 5 FIRE FIGHTING MEASURES				
5.3 Advice for firefighters				
Special protective equipment for firefighters:	Wear self-contained breathing apparatus and protective suit. Wear neoprene gloves during cleaning up work after a fire.			
Further information:	Protect from hydrogen fluoride fumes which react with water to form hydrofluoric acid. Observe local regulations when contaminated water and burning waste are removed.			

SECTION 6 ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment, and emergency procedures

Personal precautions: For solid product none required.

For dusts and fibres generated during fabrication use protective equipment to

prevent the contamination of skin, eyes, and clothing.

6.2 Environmental Precautions

Environmental

Precautions

N/A - solid product

6.3 Methods and materials for containment and cleaning up

For solid product collect with hands broom and shovel and place in non-hazardous waste collection container for disposal.

For dusts and fibres generated during fabrication vacuum up and containerise.

6.4 Reference to other sections

For disposal instructions see section 13.

SECTION 7 HANDLING AND STORAGE

7.1 Precautions for safe handling

Advice on safe handling: Solid product which presents minimal hazards to personnel when handling in

accordance with operating and storage recommendations.

The primary health hazards associated with this product are the generation of dust during fabrication and the inhalation of thermal decomposition products when the

product is subjected to temperatures greater than 300°C.

Provide appropriate exhaust ventilation at places where dust or volatiles can be

	generated.
	Wash hands thoroughly before smoking as tobacco contaminated with PTFE can cause "polymer fume fever".
Advice on protection against fire and	Dispose of in accordance with local regulations as a solid non-hazardous waste and avoid inappropriate disposal practices.
explosion:	Do not incinerate polytetrafluoroethylene (PTFE) waste.
	Provide appropriate exhaust ventilation at places where dust or volatiles can be generated.
7.2 Conditions for safe st	torage, including any incompatibilities
Requirements for	No special precautions necessary, but recommend storing in a dry cool place and
storage areas and	protecting from contamination.
containers:	
Advice on common	No special restrictions on storage with other products. Keep away from tobacco
storage:	products.
Storage temperature:	No special restrictions.
Other data:	Do not store in direct sunlight or in conditions of high humidity.

SECTION 8 EXPOSURE CONTROLS / PERSO	NAL PROTECTION			
8.1 Control Parameters				
In aircraft on the confined account of	م مراد ما دراد دراد دراد دراد دراد دراد	TLV TWA	TLV STEL	IDLH (NIOSH)
In situations in confined spaces where the temperature of the polymer exceeds 500°F (260° C), thermal degradation	perfluoroisobutylene carbonyl fluoride	10ppb 2ppm TWA	- 5ppm	-
products may be produced. Exposure limits for these products, which include perfluoroisobutylene, carbonyl fluoride and hydrogen fluoride, must not be exceeded.	hydrogen fluoride	0.5ppm	2ppm ceiling	30ppm
	proprietary additive	3.0mg/m ³	-	3.5mg/m ³ TWA
In situations where high levels of airborne dust/glassfibres are present specified exposure limits must not be exceeded.		OSHA-PEL 5mg/m³ – nuisance dust PEL (respirable dust fraction) 15mg/m³ – 8 hour TWA (total dust	ACGIH-TLV 5mg/m³ - 8 hour TWA (inhalable) 1 fiber/cm³ - 8 hour TWA (respirable)	Other 3 x 10 ⁶ fibers/m ³ - 10 hour TWA (NIOSH)

f:	١
fraction)

8.2 Exposure Controls

Engineering measures: If cutting, sawing or sanding of the product is necessary, to maintain exposures

below recommended limits, a properly designed dust collection system is recommended at the operation source. Adequate ventilation must be provided

when working with the product at elevated temperatures.

Eye protection: Throughout basic product handling processes, and whenever handling materials

containing fiberglass, safety glasses, goggles or face shields should be worn.

Hand protection: Throughout basic product handling processes, leather or synthetic fibre gloves are

recommended to minimize cuts and abrasions.

Skin and body

protection:

The wearing of a loose fitting long sleeved shirt that covers to the base of the neck

and long trousers is recommended to minimise exposure to fiberglass. Skin

irritation from exposure to fiberglass is known to occur mostly at pressure points

such as around the neck, wrist and waist.

Hygiene measures: Handle in accordance with good industrial hygiene and safety practices.

Wash hands immediately after handling the product and do not contaminate

tobacco products.

Be careful not to rub or scratch areas irritated from fiberglass exposure, as fibres may be forced into the skin. Wash off any fiberglass in contact with the skin, and

consider the use of barrier creams which can minimise irritation.

Always use vacuum equipment to remove fibres and dust from clothing and never

use compressed air.

Contaminated clothes should always be washed separately.

Respiratory protection: Not required for normal use of the product.

In situations where high levels of airborne dust/glassfibres are present and which

exceed permissible exposure limits, or irritation occurs, then a correctly fitting

NIOSH/MHSA approved disposable dust respirator should be used.

In situations in confined spaces where the temperature of the polymer exceeds

500°F (260° C), an air supplied respirator should be used.

In situations where high levels of airborne dust/glassfibres or fume, use industrial

hygiene monitoring to ensure that TLV or PEL values are not exceeded.

Excessive exposure to thermal degradation products could result in delayed pulmonary edema and in some cases, and on very high exposure damage to the liver and kidneys. These substances may include perfluoroisobutylene (TLV = 10ppb), carbonyl fluoride (TLV = 2ppm TWA, 5ppm STEL), hydrogen fluoride (TLV =

2ppm ceiling, 0.5ppm TWA).

9.1 Information on I	basic physical	and chemical	properties
•	D.I.		

Appearance: Black, various Upper/lower flammability or

thicknesses explosive limits:

Physical state: Solid Vapour pressure: N/A

Odour: Odourless Vapour density: N/A

boiling range:

Flash point: N/A Decomposition temperature: 572°F (300°C)

Evaporation rate: N/A Viscosity: N/A

Flammability (solid, gas): N/D

SECTION 10 STABILITY AND REACTIVITY

10.1 Reactivity: Stable at normal ambient temperature and pressure

10.2 Chemical stability: Product is chemically stable

10.3 Possible hazardous reactions: Stable under recommended storage conditions

10.4 Conditions to avoid: Avoid heating for prolonged periods above the recommended

upper usage limit

10.5 Incompatible materials: Alkali metals, Strong oxidizing agents, Halogenated compounds

10.6 Hazardous decomposition products: May include:

Fluorinated hydrocarbons, Carbonyl fluoride, Hydrogen fluoride, carbon oxides, perfluoroisobutylene, tetrafluoroethylene,

N/A

hexafluoropropylene, trifluoromethane, oxides of sulphur.

SECTION 11 TOXICOLOGICAL	INFORMATION		
11.1 Information on toxicolo			
Acute oral toxicity	Polytetrafluoroethylene	Proprietary Additive

Mutagenicity assessment	Polytetrafluoroethylene and Properties on bacterial or mammalian	prietary Additive cell cultures did not show mutagenic effects.	
Carcinogenicity assessment	Polytetrafluoroethylene Not classifiable as a human carcinogen	Proprietary Additive IARC classification as 2B (possibly carcinogenic to humans) but not a hazardous substance according to GHS	
Toxicity to reproduction assessment	Polytetrafluoroethylene and Pro No toxicity to reproduction	prietary Additive	

STOT-Single exposure No data available

STOT-Repeated exposure No data available

Aspiration hazard Not applicable

SECTION 12 ECOLOGICAL INFORMATION

12.1 Toxicity Toxicity to fish (Polytetrafluoroethylene and Proprietary

Additive) - the substance is a polymer and is not expected to

produce toxic effects.

12.2 Persistence and degradabilityno data available12.3 Bio-accumulative potentialno data available12.4 Mobility in soilno data available12.5. Results of PBT and vPvB assessmentno data available

12.6. Other adverse effects

Additional ecological information no data is available on the product itself.

SECTION 13 DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Product Where possible recycling is preferred to disposal or incineration. Dispose of in accordance

with local regulations. Incinerate only if incinerator is capable of scrubbing out hydrogen

fluoride and other acidic combustion products.

SECTION 15 REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

USA

TSCA Status: All ingredients in the product are listed in the TSCA inventory

SARA Title III

Sec. 303/304: None

Sec. 311/312: Not applicable
Sec 313: Not applicable
CERCLA RQ: Not applicable

California Prop 65: This product does not contain chemicals known to the State of California to

cause cancer of the reproductive system.

State Right-to-Know Lists: Massachusetts, New Jersey, Pennsylvania: This product does not contain any

chemicals listed for state right to know purposes.

Canada This product has been classified in accordance with the hazard criteria of the

Controlled Products Regulations and the SDS contains all the information

required by the Controlled Products Regulations.

WHMIS Classification: No

(for workplace exposures)

Not controlled

New Substance All ingredients in this product are listed, as required, on Canada's Domestic

Notification Regulations: Substances List (DSL).

NPRI Substances: Not applicable.

EC Classification for the Substance/Preparation

Symbol: This product is not classified as dangerous according to Directive 1999/45/EC

and its amendments.

German Water Hazard

Class

German Water Hazard Class WGK nwg. Non-water polluting substance.

Other regulations: Take note of Directive 98/24/EC on the protection of the health and safety of

workers from the risks related to chemical agents at work.

15.2 Chemical Safety Assessment

No data available

SECTION 16 OTHER INFORMATION
